

OCTOBER 2022: THE DISABILITY PREDATED THE HOUSING CRISIS.

A narrowly limited excerpt from a hospital discharge summary dated October 19, 2022. The complete medical record is not published.

“[Patient] is an anesthesiologist critical care physician from California presently on disability ...”

Why this excerpt is included

The City record repeatedly refers to severe mobility limitations, serious chronic illness, and difficulty completing an extensive administrative process. This contemporaneous hospital record establishes one narrow fact: disability status was documented years before the 2025 ceiling collapse, the 2025 City complaints, and the February 2026 inspection.

What this excerpt does not claim

It is not offered to attribute any diagnosis to the property or to prove medical causation. It is included only as context for the documented vulnerability and the need for an accessible, timely government process.

SOURCE	Hospital discharge summary signed October 19, 2022; admission October 17-19, 2022.
PUBLIC SCOPE	Name, medical-record number, date of birth, age, race/ethnicity, diagnoses, medications, clinician names, and unrelated clinical details are omitted.
PRESERVED	The complete original source remains preserved separately.
