I think that should work. Btw. That guy that put the dishwasher never came back to fix the door. He just pulled it out and left a hole. I tried to buy a door w similar defensiones but not sure it will actually work. Any chance you could get your handyman to see if it works or if there's a better option?

Im so grateful for my disability and settlement but it's like waking up from a coma to realize there's so much to fix.

Okay good , I'll let the know.
But if anything changes, let me know and I'll reschedule it.

I'll check with my guy today, I had told him about that door, but he said he didn't want to knock on your door and I wasn't here most of the time he was.

What else is there to fix?

I think that's it.

The window in the kitchen is really busted from the termites.

And if he does plumbing the bathroom sink is rather weak. But I'm happy to report the bathroom is stellar!

What is weak about the bathroom sink?
The flow from the faucet or how it drains?

I'll need to take a look at the kitchen window, hopefully it's just the frame bc the window is vinyl clad and HD just been installed before you moved in.
